## EDUCATION

### B. Tech in Computer Science

Guru Gobind Singh Indraprastha University

06/2020 - 2024

New Delhi, India

### Class 12

Good Samaritan School

04/2018 - 03/2019

Jasola, New Delhi

## WORK EXPERIENCE

### Full Stack Developer Intern

ITMTB Technologies Private Limited

06/2022 - 12/2022

New Delhi, India

#### Achievements/Tasks

- Designed and implemented the architecture of a significant project with multiple portals, database design, endpoints, folder structures, and middleware, ensuring efficient and scalable development.
- Integrated Docusign API to automate client onboarding processes (forms and NDAs), streamlining operations and enhancing efficiency.
- Enhanced application performance and refactored the codebase using rtk query, resulting in a smoother user experience and improved development workflow.
- Developed attractive, responsive UIs for multiple projects, demonstrating a keen eye for design and a user-centric approach.

### Frontend Developer

Cruxe

05/2022 - 08/2022

New Delhi, India

#### Achievements/Tasks

- Converted Figma designs to clean UI using React, Tailwind CSS, Material UI.
- Handled all the frontend tasks like creating type-safe and robust components, integrating libraries, state management.
- Refactored the whole codebase to use Tailwind CSS, upgraded legacy redux to the latest redux toolkit and replaced old deprecated dependencies with new dependencies.

### Frontend Web Development TA

Coding Ninjas

02/2023 - 2024

#### Achievements/Tasks

- Resolved 1300+ student doubts in frontend web development via chat/video calls.
- Provided personalized guidance to enhance student understanding.

Python

Java

HTML/CSS

C++

Tailwind CSS

Firebase

Git/Github

Mongo DB

SQL

AWS

Data Structures And Algorithms

Flask

Responsive Design

WebRTC

Redux

Strong debugging and troubleshooting skills

## PROJECTS

### SciMeet - Real-time Chat and Group Video Calling Platform

- **Tech Stack - WebRTC, Socket.io, Node, React, mongoDB, typescript**
- Developed a website enabling user registration, chat functionality, video calls, and group calls. Built with Socket.IO in Express.js for real-time communication and React for the frontend. Prioritized user privacy and security.

### Alqatar.qa

- **Tech Stack - Next.js, Node, Typescript, MongoDB, Redux**
- Spearheaded end-to-end architecture, covering backend and frontend, for captivating bilingual website using Next.js with seamless static and dynamic integration.
- Designed and implemented a custom multistep appointment system, enhancing user experience and simplifying booking procedures.
- Successfully integrated Sadad payment gateway, enabling secure and seamless online transactions.
- Utilized SendGrid for efficient email automation, ensuring smooth communication and engagement with users.

### JobbedIn

- **Tech Stack: React, Node, Express, Mongo DB, Tailwind CSS, Redux.**
- Developed a user-centric job portal with seamless candidate and employer interfaces.
- Implemented robust JWT authentication and Google Auth for secure user login and email verification using Nodemailer, prioritizing data privacy and trust.
- Crafted intuitive user interfaces for candidates, employers, and job listings, ensuring a seamless and engaging user experience to boost user retention and satisfaction.
